TVS OUT AND PROJECTORS IN AT BIALIK
DIB WELCOMES THREE NEW STAFF MEMBERS
WELLINGTON SC MOVES TO LCD
SCHOOL HALL GETS MULTIMEDIA FACELIFT

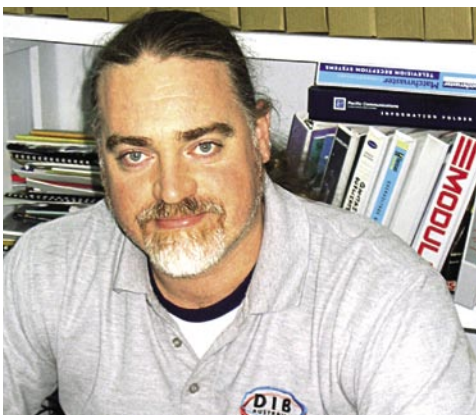

TVS OUT AND PROJECTORS IN AT BIALIK

Bialik College recently finished off their new building works with the help of four new DIB Australia Projector Installs. Bialik took advantage of one of many special offers DIB have run over the years, and installed their XGA projectors combined with a multimedia DVD/VCR and Amplified Sound solution. The package was rounded off with connections to the school's existing MATV system, allowing the projectors to display television feeds. There were no disruptions to classrooms as the installation took place over the

school holidays. The students returned to classes to find 4 new LCD projectors, and within days of installation Year 12 students were using the technology to view their videos (such as the year 12 "text" Bladerunner) on their large 100-inch screens.

With the help of Ron Unger Architects, DIB Australia has been able to design and install a fully functional classroom LCD projector system, which will benefit Bialik for many years to come.

DIB WELCOMES THREE NEW STAFF MEMBERS

DIB Australia is pleased to welcome three new staff members to the roster. Mr. Ray Lakeman arrives at DIB to take on the new role of Project Manager. Mr. Simon Alder is a new addition to the consulting team, and Mr. Lloyd Hird (not pictured) is our most recent addition to our growing list of technicians. If you see any of these gentlemen on your travels be sure to say hello.

WELLINGTON SC MOVES TO LCD

DIB Australia is proud to have recently assisted Wellington Secondary College with the installation of classroom LCD projectors. Working closely with the school's I.T. Manager, Mr. Eugene Stefyn, our Solutions Consultant Sam Garden was able to refine a solution to fully accommodate the schools needs and budget. Incorporating our highest level of projector security, the powder coated security cage, these projectors are turning dull classrooms bright. Complete with wall mounted security enclosure for the DVD player, sub-woofer sound and the projector control panel, this installation offers great features and high security, all in one simple package.

SCHOOL HALL GETS MULTIMEDIA FACELIFT

Many schools in Victoria have one – a tired school hall, having served many generations of students and now looking for a multimedia facelift.

Over the last few months the team at DIB Australia has assisted a number of schools in revitalizing these important resources, transforming them into functional and dynamic multimedia presentation suites.

Box Hill Senior Secondary College is our most recent example of just such a transformation. Earlier this year Wayne Craig (Principal) and Brad Shannon (IT Support) from Box Hill Senior Secondary College (BHSSC) engaged DIB Australia to re-fit their hall with an LCD projector and sound system. The school (located in Dunloo Avenue, Box Hill) has a reputation as one of Victoria's leaders in contemporary performance arts and music programs.

Keen to maintain this well deserved reputation Wayne and Brad approached DIB Australia's consulting team with their expectations for the hall.

Our team was able to deliver BHSSC with an excellent result, always keeping in mind budget restrictions.

FEATURES OF THIS SYSTEM INCLUDE:

- ✓ 3.4m wide 'motorized' projection screen, complete with automatic operation – lowering and raising as the projector turns on or off.
- ✓ Full featured LCD display remote control panel.
- ✓ CD player
- ✓ Multi Format combination VCR/DVD player
- ✓ 2 multimedia PC input points
- ✓ 1200W six speaker professional public-address sound system, including PC audio and microphone inputs.

Special provision was also made to allow the schools existing specialized PA equipment (large mixing desks, microphones etc.) to be integrated (as required) with the new speakers and amplification.

As a result this school now has a formidable AV system, equipped for every possible function – from simple School Assemblies to full blown multimedia presentations.

For more information on this or any other AV installation please contact DIB Australia today.
