29th November, 2007

We first became aware of D.I.B through their website and approached them for a quote for two classroom projector installations. We found their quote to be most comprehensive and their communication was fast and reliable. Our consultant Sam Garden was great! He answered all our questions and was prepared to work around us schedule wise. He was in contact to give us an idea of when we could expect the installation to take place, which worked fantastically as we could then work this out with the classrooms involved. The actual installation itself went smoothly. We are very happy with the installation and D.I.B's service.
