

CLASSROOM CONTROL

DIB Australia specialises in a variety of cost-effective control systems to suit your classroom. Designed to control a room's multimedia features from projectors and DVD players to sound and lighting, our control panels are simple to use and save your teacher's valuable time.

JOEY MICRO

APPLICATIONS

- Highly affordable solution for classrooms
- Control major room functions from single wall mounted touchscreen panel

FEATURES

- 6 customisable buttons – you select the 6 best controls for your system
- Buttons can be programmed to automate multiple operations at once

JOEY LITE

APPLICATIONS

- Ideal solution for classrooms
- Control multiple devices – anything that uses a remote control (projector, DVD player etc.)

FEATURES

- 24 customisable buttons – create a layout that will cover everything you need
- Buttons can be programmed to automate multiple operations at once

ADVANCED CONTROL

DIB Australia can design advanced control systems to simplify the most complicated of multimedia areas. These control systems can perform all the features of the classroom controllers and more. Multiple automated processes can be set off with the press of a single button, ideal for lecture theatres, large school halls and cinemas.

ONE BUTTON PRESETS

- Reduce multiple steps to one button
- Sound and lighting systems can be simplified to preset modes. For example, pressing presentation mode button sets lighting to dim, lowers projector screen, turns projector on and selects projector's computer input

Pressing DVD on the main menu (left) opens up a DVD sub-menu (right)

DYNAMIC LCD TOUCHSCREEN

- Dynamic menu screen allows greater control of multiple devices
- Each device has its own sub screen that opens from the main menu showing its own control functions

PORTABLE WIRELESS CONTROL

- Wireless version of above panel allows control from anywhere in the room
- Perfect for presentations, performing arts or general activities such as dance and PE classes, where control is required from the floor

NETWORK INTERFACE

- Access your controller from any computer on the school's network
- Ideal for IT support as technician can login from their office
- Highly secure
