Wendy Hubbard, Principal, Chatham Primary School.

“ I was very pleased when Sam was awarded the contract because of his demonstrated level of consultation, his frequency of visits and excellent communication skills.

He was able to explain the complexity of the task very simply. He had worked on Stage 1 of the building program and did not hesitate in giving us any time we needed.

We got value for money as DIB took a holistic approach, establishing a ‘backbone’ that the school could use for other services

We have since employed a TSI who is happy with the documentation and has had no difficulty installing a new server.

DIB has established a very cordial relationship with myself and school administration staff and the builder who worked on Stage 1 of the school building program. I will be looking to DIB in the future to maintain this high level of service.”
