Success Story – Mark Muller

Recently, Mark Muller worked with DIB as a TSI for Camberwell Primary School.

Mark was impressed with the company and its principal, Sam Garden–

“Sam is a clear thinker and easy to work with. We both knew where we stood. I was impressed with his knowledge and the solutions he put forward. Sam was especially effective regarding the old 3M fibre connections which were limiting the speed of the network. The school board had begun to think it would have to replace the cables but Sam’s plan to terminate them properly increased the speed and extended the life of the cable at the same time.

I spent a lot of time working at another cluster but DIB kept in good communication by email throughout the project. They took photos at different stages of the job, showing exactly where the cable was laid and that it was kept neatly and tidily in the trays. They were able to bring the cabling costs in on budget whereas the budget for other equipment blew out.

I am impressed with the DIB service. I have already referred other clients to DIB and based on their competitive quotes may be happily working with them again soon.”
