Dear Sam,

Thank you for organizing the video projection system for staff in computer laboratory A20 at Westall Secondary College. We have had the chance to use it for a variety of different classes including the wet weather program and computer games club!

My technicians were certainly impressed with how easy it will be for staff to use. Your recommendation of the a supporting sound system, projector, screen size and cabling mean that our college has a robust and flexible college resource that should last us for a very long time.

It is sometimes difficult to source good audio and video advice and I have appreciated the time that you took to walk me through some of the issues that we need to consider. I also appreciated the help by your technical staff during the installation to save our electricians some post installation work with the pull through cabling and the minimal disturbance to the classroom roofing.

We look forward for us to doing the same thing for some room A25 and wish you and your team all the very best for 2005.

Yours truly,
