

# Specifications

**Dimensions**  
1200mm (H) x 2400mm (W)

**Touch**  
Finger, any pointing device or stylus

**Touch activation**  
Proximity; hover-capable

**Touch surface**  
Ceramic steel, glare optimized

**Resolution**  
USB reported 32767 x 32767

**Response time**  
Typical 71 touches / second (14 ms)

**Software**  
No driver software required

**Calibration**  
Four-point calibration

**Operating systems**  
Windows, Macintosh, Linux

**Warranty**  
Up to 5 years

# Optical Touch Technology

Camera Detail

The optical touch technology used in 2Touch has been developed in Australia. Minute cameras located around the surface detect the exact location of any object approaching the screen. The signal is used to communicate with a connected computer via USB.

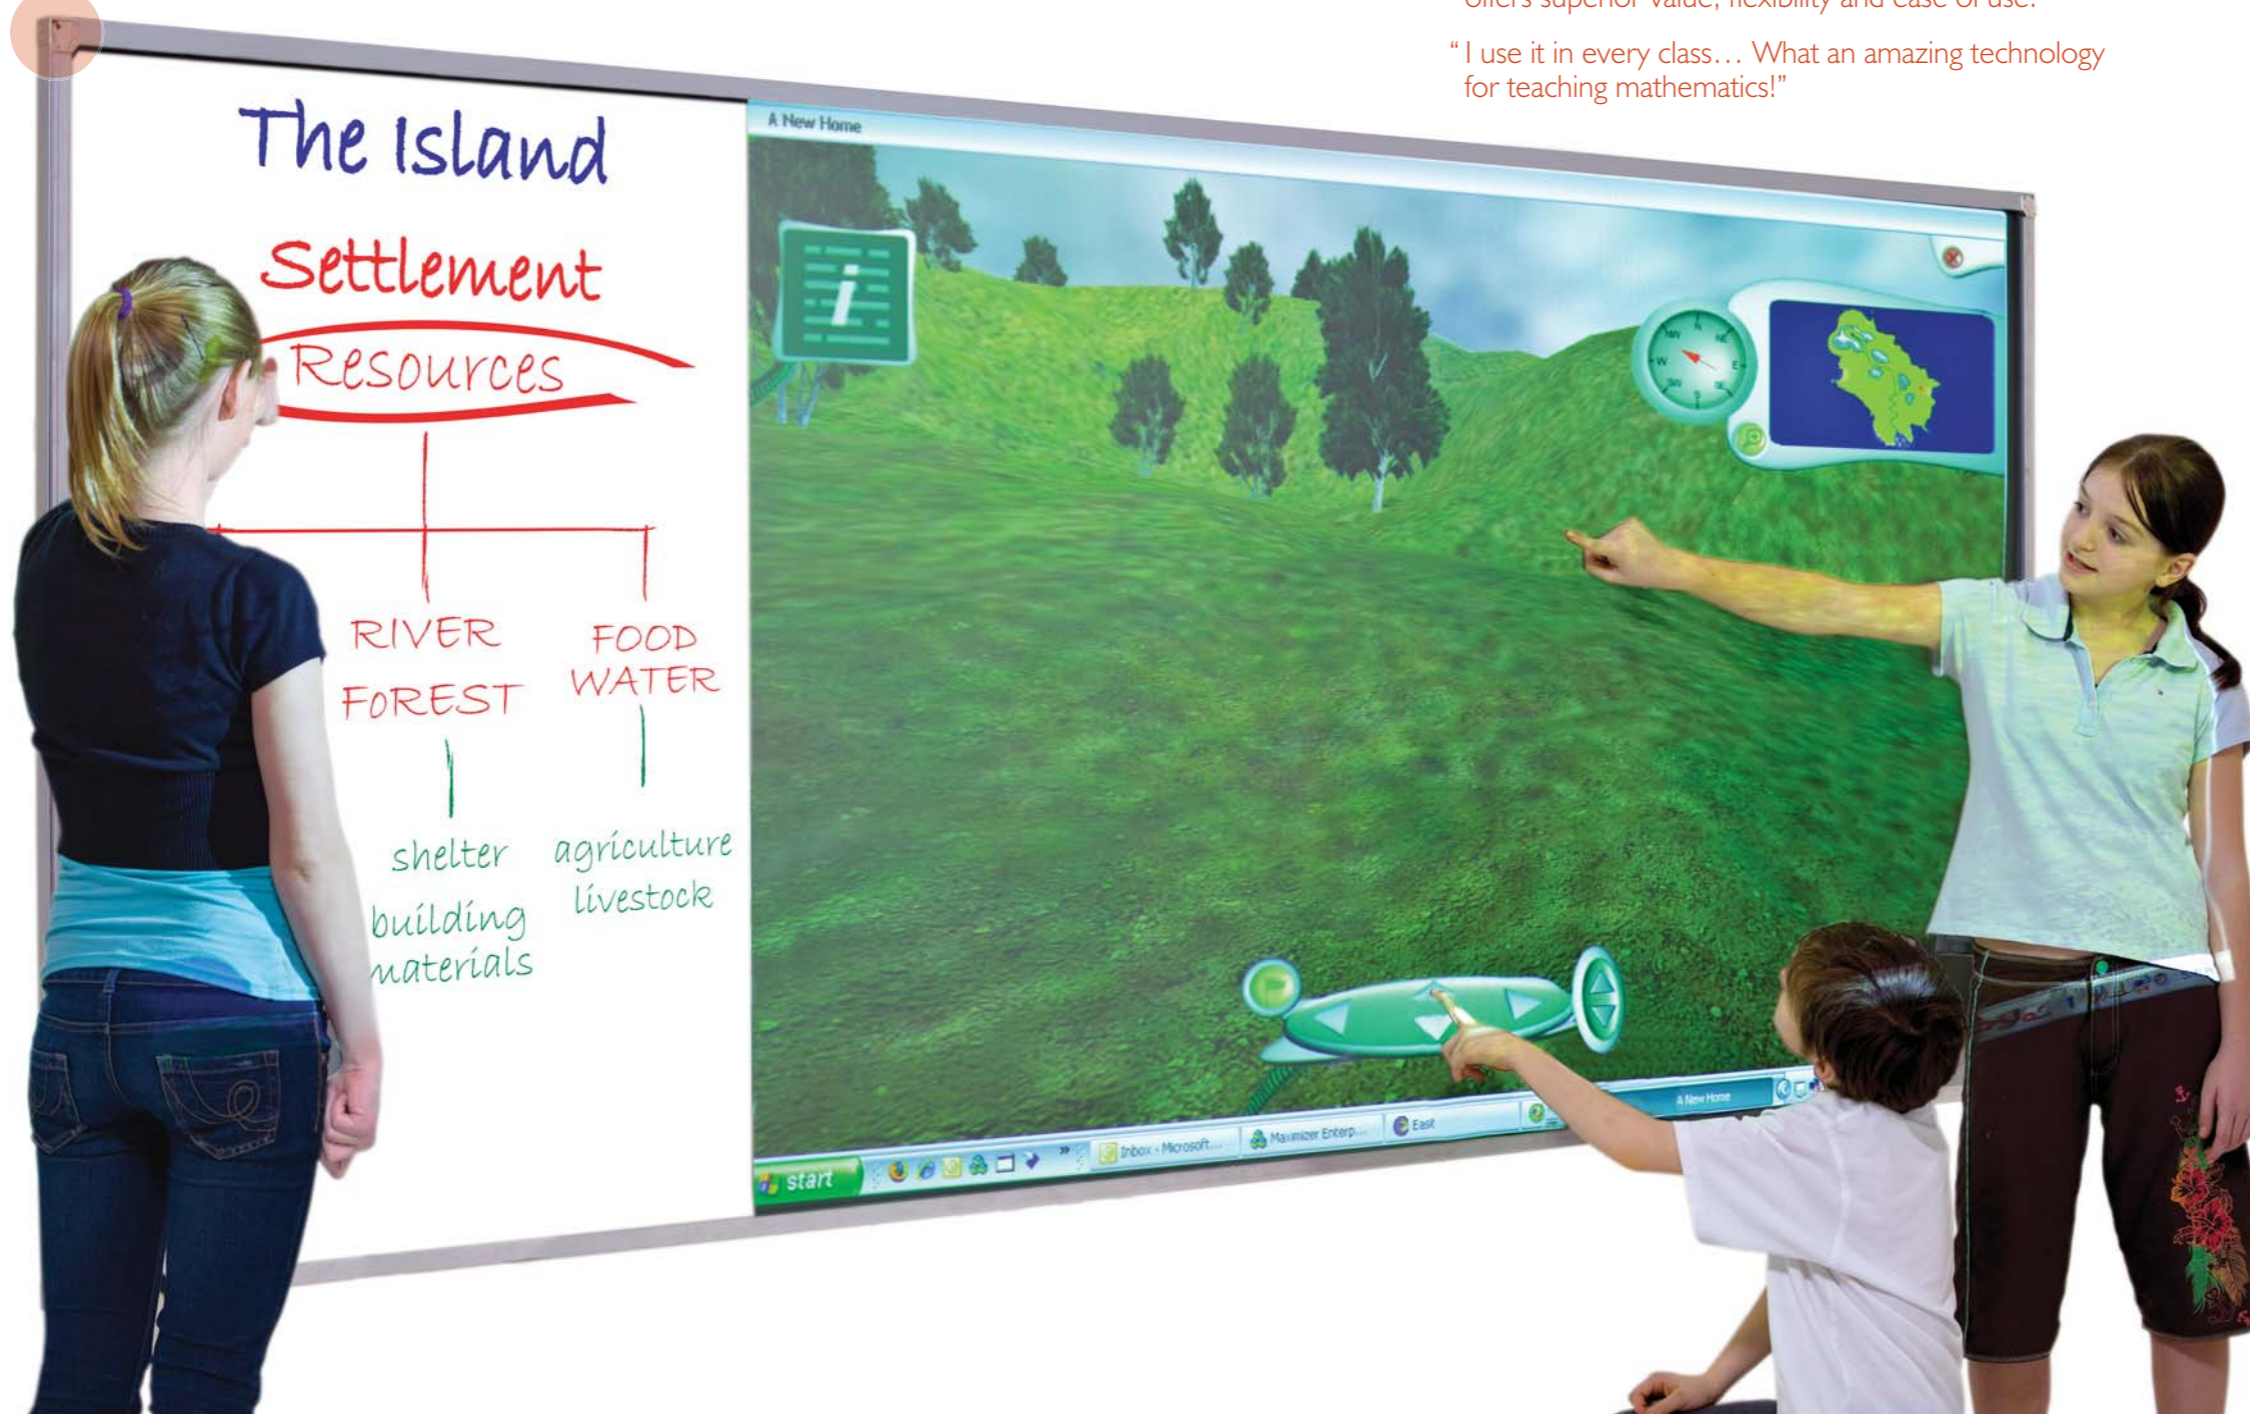

**Optical touch technologies are independent of the surface itself, so any flat surface can be used to connect to any computer.**

## Teachers Talk

"Compared to other solutions trialed, the 2Touch whiteboard offers superior value, flexibility and ease of use."

"I use it in every class... What an amazing technology for teaching mathematics!"

## Benefits

**Optical touch is easy and intuitive:** There simply is no better way to communicate with a computer.

### No down-time

No special pens to lose or break; no batteries to run out. With no drivers to maintain, support issues are eliminated.

### Worry free

A choice of porcelain steel writing surfaces provides visual quality and worry-free use with fingers, pens or markers.

### Easy plug, touch and go!

With no special software needed, any computer can instantly connect to a 2Touch board. Guests and relief teachers use 2Touch easily.

### Wider is better

Experience shows that wider whiteboards help teachers explain complex concepts. The 2Touch whiteboard is 2.4m wide.

### Protect your future

Why lock your school to the software supplied by your IWB vendor? Keep your choice of software and education content separate from your choice of hardware. Stay open! Award-winning Easiteach software is included.

### Custom options:

Choose sizes and frame colours for the most efficient use of available space & resources.

### Australian made value

2Touch provides at least 20% more usable surface area per dollar than its rivals.

## BENEFITS AT A GLANCE

2Touch outperforms competitors in each of the following areas:

Accurate touch & hover	✓✓✓
Large and wide	✓✓✓
Vandal resistant	✓✓✓
No calibration drift	✓✓✓
No special software	✓✓✓
Multiple use capable	✓✓✓
