

BUCKLEY PARK COLLEGE ESSENDON

23rd October, 2007

To whom it may concern,

We selected D.I.B to install a new projector system into two of our school classrooms. One room was a science room and other a portable classroom, therefore both required a tailored solution. After having viewed their website and having been referred by another party we approached D.I.B with the aim of establishing contact with a reliable company for not only this job but also for future work. Sam knew was able to offer us a range of suggestions – his knowledge and expertise was invaluable, so we decided to go ahead with the installation. In terms of the production process it was good to be able to talk to the staff at D.I.B about timing given the issues of building happening at the school at the time. I would recommend DIB to anyone that is looking for AV installations.

Kind regards,

Michelle Crofts
