

CONCORD

Dear Sam,

I am writing to thank-you for all the support and advice you provided me recently. The decision to purchase a Mimio and projector for two of our junior grades was made easier with all the information you provided. To have the opportunity to view and play around with the Mimio prior to making any decision meant that I really got a feel for the equipment and an idea of how to incorporate it into my program. The junior children are enjoying every minute of it, student engagement has increased and everyone is very eager to have ago and contribute to interactive lessons.

We are using the Mimio across all areas of teaching and have found that it has increased our use of other programs. Something as simple as a PowerPoint slideshow using the student's photos is now a whole new experience with the large on screen viewing and the children being able to create at the board. Galaxy Kids, Spelling Centre, Clicker 4, Internet and Boardmaker are all programs that have been enhanced by your product. The Mimio being easy to use, portable and affordable has made lots of other teachers interested in incorporating it into their classrooms.

As a school we have been very pleased with the purchase and envision more Mimio's throughout the school in the coming years.

Thanking -you Rebecca Campbell
